Reminder of Upcoming Retroactive Designated Pipeline Licensing Deadline

The Ministry of Energy and Resources (ER) is providing a final reminder to all owners and/or operators of unlicensed flowlines or previously exempt pipelines that the deadline to retroactively license designated pipelines is **January 20, 2024**. Failure to perform retroactive licensing may result in administrative penalties as per Item 4 of the Table 2 Provisions in *The Pipelines Administrations and Licensing Regulations* or other regulatory enforcement actions. Owners and operators should submit to the ER Service Desk an updated licensing plan if there have been any changes to the initial plan submitted. Operators who have recently acquired pipeline infrastructure and have yet to submit a plan must do so immediately.
